Hardware Store Changes Hands.

Another change in the local business world is now recorded, with the retirement of Mr. C. W. Russell from the business with which he has so long and honorably been connected. Mr. Russell is one of Stony's pioneer merchants, being one of the first to locate here when the town was founded, and has made a very enviable record for himself during that time.

His successor is Mr. A. E. Michael, a young, practical and enterprising hardware merchant, with an experience extending over two towns in Alberta. Mr. Michael will have a first-class tinshop in connection, and will guarantee the service in this department; while the hardware business will be brought up to date, and customers will find a first-class stock from which to select their require-

Father and Son Banquet

The local trail rangers held their first father and son banquet Friday March 21; 15 boys with their dads and guests sat down to supper. After everyone had filled up everyone was happy. Ray Wilson was toastmaster. The toast to the King was responded to by everyone singing the National Anthem. The other toasts were: What a boy owes to his community; What the community expects of the boy; What a boy expects of his dad; a toast to Our Mothers; What a boy expects of his Sunday school teacher; Our guests; with a solo on the piano by Mailey Donaldson; Mr. Hawks recited two of Dr. Johnson's poems. The evening all too speedily drew to a close and our father and son banquet went down into history as the best event of its kind ever held in Stony Plain.

LOCAL NEWS

Mr. Wells, the Edmonton lawyer, now visits Stony every Thursday afternoon.

Mr. P. H. Baron has taken over the contract of carrying the town mail.

Wireless Henry has been bumped out of his position on the railway here, and is leaving for B. C.

Joe Enders is planning a trip West.

D. Stetler, Hatherdown, was a business visitor in Stony on Tuesday.

Mrs. Ed. Summerfield is leaving shortly on a visit to friends at Leduc.

Raymond Shaul and Emil Baron, Edmonton, were visiting their parents here over the week end.

Don McKaig, one of the pioneers of Tomahawk district, was in Stony on Monday.

Bussan Kellough succeeded in making the trip on Saturday from Edmonton with a load of freight.

Stony Plain Town Council meets tonight.

Mr. Robinson has entered on his duties as the local school, his place at Rosedale school being taken by Mr. Levy.

At the local Court on Monday Mike Idemsky was suing Don Brown of Grassina for \$50, wages due. Brown had a contra account. The case was settled, with costs against defendant.

Owing to the inclement weather on Saturday, the sale of the Agricultural Society had to be postponed. The new date is Sat. April 12.

Saturday's train for Prince Rupert left here four hours late.

A number of local cattle-men are attending the Stock Show in Edmonton this week.

Ducholke's Hall was well filled last evening, when the Athletic Association's social evening was held; cards and music helped to pass a very pleasant evening, when lunch was served after midnight. After lunch, dancing was indulged in for a few hours.

Auctioneer Washburn held an auction sale on Saturday last in front of Stony Plain Postoffice of the property formerly held by Karl Miller, seven miles south of Stony. Bidding was lively until the sum of \$4000 was bid by Ph. Altheim, who secured the property.

Auctioneer Washburn held an auction sale on Saturday last at Spruce Grove of four quarters of land, SW 23, SE 3, SW 2, all in 53, 27, 28, and NE 34, 52, 27. No bids were received. The reserve bid is said to have been set at \$20,000.

Policies Tending To National Development

The announcement in the Speech from the Throne at Ottawa of the Government's intention to reduce taxation with a view to lessening the cost of instruments of production in basic industries was immediately and generally accepted as indicating a lowering of the tariff on agricultural implements, and no time was lost by the manufacturers of such implements in Ontario in organizing deputations to Ottawa to protest against any such action.

While not disclosing the Government's intention in advance of the Budget statement, Premier King intimated to one such deputation that there were other ways of lowering costs than through tariff reduction, and in this connection referred to the Sales Tax.

The whole subject of tariffs and taxation is an economic one, a matter of national business, a problem in trade and commerce, and as such comes within the class of subjects frequently discussed in this column. Unfortunately, these things have also become inseparably bound up in party politics, and partisan issues are avoided as much as possible in dealing with national questions in articles in this column. There is, therefore, no intention of discussing the merits or demerits of Protection, Tariff for Revenue, or Free Trade.

There is one aspect of Canada's national position, however, deserving of the most thoughtful attention of all Canadians irrespective of their views in regard to fiscal matters.

Export manufacturers constantly advance as an argument in support of their demand for tariff protection that the balance of trade between Canada and the United States is decidedly against the Dominion and in favor of the Republic; that we annually buy millions of dollars worth of goods and supplies from the United States in excess of the amount we export to the south, and that as a result the Canadian dollar is at a discount across the line. And this is perfectly true.

But who is responsible for the heavy importations from the United States? Is it the Canadian farmer through his purchases of agricultural implements and other farm implements? Is it the great body of Canadian consumers through their purchases of United States clothing, boots, hats, furniture and other articles? Or is it the Canadian manufacturer himself who so persistently urges the great loss to Canada because of the existing adverse balance of trade?

A return just tabled in the House of Commons contains the answer. Canada is one of the richest countries in the world in coal deposits, yet in 1923 the Dominion imported 20,417,229 tons of coal from the United States which even at the low figure of five dollars a ton means over \$100,000,000. During the same year Canada imported \$152,854,267 worth of iron and iron products. Here is a total of a quarter of a billion dollars largely for the use of Canadian manufacturers. On the other hand during 1923 our imports of farm implements and machinery from the United States only amounted to \$11,721,956.

Among the most highly protected countries in the world during the past quarter of a century have been the United States, Germany and Japan. In each of these countries the protection afforded the home manufacturers has been utilized by them to develop the raw natural resources of their respective countries. They have imported such raw materials as could not be obtained at home, but have used their wealth to develop and provide raw materials at home wherever possible.

The Canadian manufacturer is blameworthy in that he has not to anything like the same extent used his capital and applied his energy to the development of Canada's natural resources. Protected in his home market, he has followed the lines of least resistance and gone on importing raw materials, or semi-manufactured materials, and piling up an adverse balance of trade, while our great natural wealth of resources has remained dormant and undeveloped.

Had Canada's manufacturers made use of the protection afforded them to develop our home supplies of raw materials, thereby providing employment for countless thousands, he would today be enjoying a much larger home market for his products, while the hundreds of millions of dollars annually drained out of the Dominion would have been saved to Canada and facilitated our national development and added enormously to our national prosperity.

The present situation in Canada, and the objection of thousands of Canadians to the policy of tariff protection, is not so much the result of protection, nor antagonism to that policy, but is the result of the misuse of the protection as afforded them by the great bulk of Canadian manufacturers. The more progressive and unselfish manufacturers realize this. Unfortunately, both for themselves and for Canada, the majority of our manufacturers have pursued a narrow, selfish policy, aiming at the accumulation of large profits to themselves with the least initiative and expenditure of effort on their part, and quite regardless of the national good and permanent development and prosperity of the Dominion as a whole.

An Alkali Pool

The Lethbridge and district alkali growers are signing up a pool to handle the production of alkali and all classes of hay, and may merge with the Pincher Creek Co-operative Association and thus control all production in the south and southwestern part of the province. It is expected that 50 per cent. of the growers will sign up.

Men and women may get too old to love, but they never get too old to want to be loved.

A Corrector of Pulmonary Troubles.

Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

"What's all that noise over at the minister's house?"

"Oh, he's memorizing his sermon; he always has to practice what he preaches."

Pure Seed Grain

40,000 Bushels Have Been Marketed For Seed Growers in Alberta

About 40,000 bushels of pure seed grain have already been marketed for seed growers of Alberta through the Provincial Government cleaning and grading plant at Edmonton. A good deal of this has gone to eastern points, and there has also been a considerable quantity sold in the province. The demand for good seed continues strong.

Who's Chest Colds Subdued Over Night

Trained Nurse Tells How Colds Are Quickly Broken Up

NERVILINE

A Home Necessity

Speaking of valuable home remedies that every mother should always keep on hand, Nurse Carrington says: "I haven't met any preparation more dependable than 'Nerviline.' It is the ideal liniment; every drop rubs in—it is absorbed quickly, eases and relieves congestion in a short time. For chest colds, pain in the side, stiff neck, earache and toothache, I have found Nerviline invaluable. In treating the minor ills that arise in every home, nothing is more efficient than Nerviline."

For nearly fifty years Nerviline has been a household article in thousands of Canadian homes. Get a 35c. bottle today.

Alberta Ships Seed Oats

Another carload of Victory and Banner seed oats has been shipped from Edmonton to Toronto by the provincial seed cleaning and marketing plant. It is being followed by two more cars in the next week or two.

A GOOD SPRING TONIC

One That Will Quickly Improve Your Health

With the passing of winter many people feel weak, depressed and easily tired. No particular diseases, but the system lacks tone. You find yourself tired, low-spirited, unable to get sound sleep at night. All this is the result of closer indoor confinement of the winter months, and shows that the blood has become thin and watery. New enriched blood is what you need to put you right, and there is no other medicine can give you this new blood as surely and as speedily as Dr. Williams' Pink Pills. This new blood goes to every part of the body and quickly improves the general health. The digestion is toned up, you have a better appetite, nerves are strengthened and sleep is refreshing. The value of Dr. Williams' Pink Pills when the system is run-down is shown by the experience of Mrs. Peter Arndt, Ravensburg, Sask., who says: "I was in a badly run-down condition, and prostrated with nervousness. I did not sleep at night, and grew so weak that when I tried to move about I would be overcome with dizziness. I heard about Dr. Williams' Pink Pills and got a supply. After I had taken a few boxes I began to feel better. Confining the use of these pills my appetite improved, I slept better at night, and I was soon as well as ever I had been. I have also given Dr. Williams' Pink Pills to my daughter, aged fourteen, with the best of results. I desire in this way to express my thanks for the great benefit I have found through the use of these pills, and to recommend them to others in need of a blood-building medicine."

You can get these pills through any dealer in medicine, or by mail, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Must Have Lower Taxation

Emphasizing that the United States was Canada's great competitor and that "we cannot keep our taxes up and they put theirs down, because if we do that the dollar bill is going there for investment," Walter G. Mitchell, K.C., M.P., advocated lower taxation in Canada at the fourth annual banquet of the Rubber Association of Canada held in Montreal.

When You Enjoy Them

On cold days Clark's Beans with Pork served steaming hot go to the right spot. Their savoury aroma makes them most appetizing. Tomato, Chili or Plain Sauces.

"Let the Clark Kitchen help you."

Austrian Women Admitted to Bar
Francine Marquis Beth, an enthusiastic advocate of women's suffrage, claims the distinction of being the first woman to be admitted to practice law in Austria. Completing her university course, she studied law in her father's office and recently passed the examination admitting her to practice.

Economy Campaign

Cost of Government Administration Is High Compared to U.S.

Cities from coast to coast are now co-operating in the National Economy Campaign launched in the west. Splendid co-operation from the press and speakers throughout the Dominion is paying the way for a joint meeting of eastern and western committees and the presentation of definite requests to the Federal Government.

"The national debt of Canada has almost doubled since 1918, the debt in that year was \$1,400,000,000; today it is \$2,400,000,000. We are paying in taxes to the Dominion Government approximately \$1,400,000 per day, and the statisticians tell us that one dollar out of every five dollars earned in this country goes to some government for taxes. If we take the Federal Cabinet as an example of cost to this country and compare the cost of the similar administrators in the United States, we find that in Canada we have fifteen cabinet ministers getting \$10,000 a year and a \$4,000 seasonal indemnity, making a total of \$210,000 and in addition the Prime Minister gets \$15,000 and a seasonal indemnity, making a total cost for these ministers of \$225,000. In the United States a cabinet minister gets \$12,000 and, as he is not a member of Congress, he gets no indemnity. That is to say, the United States has also cabinet ministers with portfolios, leaving out the President, and they get \$105,000 a year to handle the business of over one hundred million people, against the cost in Canada of \$225,000 to handle the affairs of approximately nine million people."

Mindard's Liniment for Cuts

Timber in Alberta

Estimated That There Are 16,000,000,000 Feet of Merchantable Timber in the Province

Forestry officials in Alberta estimate that there are 16,000,000,000 feet of merchantable timber in the province. In addition there are 247,300,000 cords of pulpwood. There are 80,000 square miles of commercial timber in Alberta and 53,000 square miles of pulpwood. It is claimed that it will not be very long before the east will be looking to the west for timber and pulpwood supplies.

It has Many Qualities.—The milk who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent aches and will speedily heal cuts and contusions. It is a medicine chest in itself.

Twenty-six thousand people can stand under the roof of St. Paul's Cathedral in London.

Africa is now the largest gold-producing region in the world.

Sale Of Wilhelm's Furniture

Former German Crown Prince Realizes Only Small Amount

The public sale of the furniture and other property used by the former German Crown Prince during his exile in Holland, will put little money in Frederick William's pocket, according to the Daily Mail correspondent at The Hague. The sale was held in the house occupied by the Crown Prince on the island of Wieringen.

The expected souvenir hunters did not arrive, says the correspondent and with the exception of the newspaper men and photographers, only islanders were present. The goods realized about \$100.

The furniture was shabby and hardly worth buying while the personal articles fetched trivial prices. Three cigarette cases, one bearing the Prince's monogram, totalled about 75 shillings, and the other things went at proportionate prices.

Women's Ailments Caused by Neglect

Proper Treatment Will Quickly Bring Back Robust Health and Good Spirits

Women are on the whole more sickly than men. One reason is that their system is more complicated; another and more important reason is, they put off measures of relief too long. At the beginning, constipation is the cause of nine-tenths of women's ailments. The blood becomes weakened and polluted—the nerves suffer, and a run-down condition takes root.

Because of their unwillingness of action as a system regulator, no medicine for women can compare with Dr. Hamilton's Pills. The kidneys quickly respond to the remedial action of Dr. Hamilton's Pills, and the result is as you would expect—pains in the back and side, shortness of breath, and bad color disappear—the functions of the body then operate naturally, congestion and pain are prevented, and perfect health returns.

Thousands of happy women say Dr. Hamilton's Pills are the greatest and best blood purifier, the finest complexion renewer, the most certain regulating medicine known. Sold by all druggists and storekeepers, 25c per box, five for \$1.00 postpaid, from The Catarthozone Co., Montreal.

Build On Faith

America is built on faith in the individual, faith in his will and power to do right of his own accord, but equally in the determination that the individual shall be protected against whatsoever force may be brought against him. We believe in him not because of what he has, but what he is. But this is a practical faith. It does not rest on any silly assumption that virtue is the reward of anything but effort, or that liberty can be secured at the price of anything but eternal vigilance.—Calvin Coolidge.

Sleeplessness

Sleeplessness, like insanity, is greatly on the increase. Modern life, with its hurry and worry and noise, brings an enormous strain on the brain and nerves.

The temptation to depend on sleeping powders or tablets must be fought off if you would avoid catastrophe. Means of reconstructing the starved nerve cells must be sought. Since the digestive system fails to supply nourishment to the blood and nerves it is necessary to employ such treatment as Dr. Chase's Nerve Food to instil new strength and energy into the tired nerves. This is Nature's way of affording lasting relief.

You will notice that while the price of Dr. Chase's Nerve Food has been increased to 40c, the box now contains 60 pills instead of 40 as formerly.

Likewise Dr. Chase's Kidney-Liver Pills are 35c, a box of 25 pills, instead of 25c, for 25 pills. Edmondson, Bates & Co., Ltd., Toronto.

New Box 60 Pills 60 cts.

Production Of Western Farms Exceeds The Combined Output Of Many Natural Resources

The first twenty years of the present century has witnessed a striking change in the character of Canada, commercially and industrially. The most important of these is undoubtedly the opening up of the wheat lands of the prairie provinces, says the National Resources Intelligence Service of the Department of the Interior.

Nearly three centuries were required to build up the magnificent farming communities of Eastern Canada, but as late as 1890 hardly more than the advance guard of agriculture had crossed the threshold of the western plains.

Twenty-five years ago neither Saskatchewan nor Alberta could muster a hundred thousand people all told. Commercially, in their contribution to the business of the country they were perhaps equivalent to less than half a dozen of Ontario's forty odd counties. Today their production furnishes the staple to a large proportion of Canadian enterprise. Western prosperity has become a barometer for business throughout the Dominion. The western wheat crop is of vital concern to business enterprise from Halifax to Vancouver. No other item of Canadian production is watched with anything like the degree of national interest that is centred upon the production of the crops of the prairies from the time they are sown until they are reaped. Governments, railways, financial institutions, manufacturers and wholesalers, business interest of all kinds, large and small, share directly or indirectly, in the boom of a good harvest or in the disappointments of a meagre one. The eagerness with which the crop estimates are received in every industrial and commercial centre of the Dominion is perhaps the most convincing testimony to the manner in which the agricultural west has shifted the whole outlook of Canadian business.

It is not only in the temporary fluctuations of current business in the distributing cities of the west itself or in the industrial and financial centres of the east or in its effect upon railway traffic and earnings from coast to coast that the pulsating power of western farm output asserts itself as a chief "prime mover" of Canada's economic machine. The western farm yields an influence far beyond the yearly variations of trade. It is the constructive force behind the building up of huge additions to the country's permanent industrial assets.

Whole communities, divorced entirely from direct farm pursuits, owe their rise or growth largely to the agricultural settlement of the prairies. The colonies of Alberta have been opened hardly less by the grain grower than the miller. Likewise the lumbermen and tent ranches of British Columbia, many of the lake shipping communities draw heavily upon the commercial support of the prairie provinces. Scarcely a city of any importance in Eastern Canada but has its four mills built or enlarged to grind western grain, its implement, textile, furniture, leather, rubber or other concerns leaning strongly upon the orders turned in by their western customers.

Summed up in all its ramifications the settlement of Western Canada can really claim credit for an enormous share of the real increase in the producing property of Canada in the last twenty-five years—whether that increase has been taken the form of the steel "hoof," or of new distributing lines and cities, or new or enlarged improvements on the Great Lakes and on the seaboard, or coal mines in Alberta, or sawmills in British Columbia or a thousand and one other enterprises.

Take another method of appraising the effect of the opening of the west. Lumbering has long been a great industry in the magnificent forests of Nova Scotia, New Brunswick, Quebec, Ontario and British Columbia. Mining, from Cape Breton to the Yukon, produces a large and steadily mounting annual return. The tremendous fisheries of the Atlantic and Pacific coasts and of innumerable inland waters employ tens of thousands of people and support a far-flung trade. It gives some conception of the change that has been wrought in the

commercial character of the Dominion to realize that the total annual product of these great industries with their centuries of development—all of the lumber cut in the whole of Canada in a year, plus all of the fish landed and marketed, plus, again, all the gold, silver, coal, copper, nickel and other wealth produced from Canadian mines—all of these lumped together do not equal in value the farm output produced each year in the prairie provinces which, twenty or twenty-five years ago were hardly so far commercially with a half-dozen Ontario counties.

Thus, in considerably less than one generation, there has been injected into the economic life of the Dominion a large producing and consuming area, so big that the Canada of 1890 presents few features at all comparable with it.

This Agricultural Empire of the west may safely be put down as the most salient feature of the newer commercial Canada.

Developing Western Route

An instance showing to what extent the western route was developing was furnished by a statement of D. C. Coleman, vice-president of western lines of the Canadian Pacific Railway, in the course of an interview at Calgary. Practically all of the Alberta wheat, at the present time, was moving that way and even the wheat from some portions of Saskatchewan, he stated.

Orient Wants Our Grain

Japan and China Must Have Canadian Wheat to Mix With Other Grains

That Japan and China, more particularly the former, must have Canadian wheat to mix with other grains for the flour they make, was the statement made in Calgary by representatives of big business interests in the Orient on the occasion of a visit made for the purpose of investigating at first-hand grain conditions in the prairies. They stated that large importations of Canadian wheat were already being made, but it was anticipated that shipments to the Orient would be considerably larger in the near future.

Cornish Honey Bee

Farmers Encouraged to Help to Keep Out Imported Article

An exceptionally fine gathering ground for honey is provided by the heather and moors of Cornwall (England), which is described by an expert as one of the best countries in the country for the purpose.

Cornish beekeepers have now appealed to the ministry of agriculture and to the local authorities for help in the cost of arranging for an expert to test the country to encourage farmers and cottagers to do their part in successfully competing with the huge imports of Japanese honey.

Navies For Dominion

The idea of each Dominion owning and manning its own navy, which would associate in the fleet possible manner with the British navy, is emphatically favored by Rear-Admiral Sir Fred. Field, commander of the special service squadron in an interview in the Melbourne Herald.

Anglo-Saxon Nations Stand For Pacific Ideals And For Future Peace Of The World

Athabasca Tar Sands

German Chemists Claim to Have Solved Difficulties of Extraction

German chemists say they have solved the riddle of the Athabasca tar sands. Areas of tar sands along the Athabasca River have been purchased and two plants will be built. One on the Northern River, where the mineral will be mined and the sand extracted, and the second plant in Edmonton, where the bitumen and oils will be reduced and refined.

Dr. Eng. C. G. G. of the parent German company, and his chief construction engineer, A. Stropper, will arrive in Edmonton in May, to decide the location of the plants, word to this effect having been cabled to H. D. Zwarg. This latter gentleman, who was a chemist in Germany prior to coming to Canada, has been working on the problem for the past five years; he spent five months in Germany and convinced the mineral specialists there that Alberta possessed vast reserves of the tar sands. He also shipped between three and four tons of the material over land, to see his own words in respect to the German chemists, "their eyes popped when they saw how rich it was."

A Brute

Maude—Dick called me a dream last night.
Dick—Well, only yesterday he told me what awful dreams he has.

The recent interchange of pacific sentiments between the sovereign and Prime Minister of Great Britain on the one side and the President of the United States on the other, of which Mr. Edward Howard was the medium, was more than the mere formal exchange of compliments which transpires whenever a duly accredited Ambassador is received. King George, speaking with the advice of his ministers, comes out openly with the declaration that good understanding between Great Britain and the United States is the best guarantee of the peace of the world. President Coolidge declares that the conscious identity of general aims in the two nations will be a mighty force in bringing to the world a just and lasting peace.

To some these utterances may seem like common-places, because they have been made unofficially on a thousand occasions by journalists and public men in both countries; but we are not aware that on any previous occasion such declarations have received the official seal of recognition by the highest authorities of the two great Anglo-Saxon powers. Woodrow Wilson, for instance, was honorably recalled for permanent peace, but he did not admit unity of aims between Great Britain and the United States. The sentiments of the King and of a great majority of the leading statesmen of Great Britain have undoubtedly lain along these lines for years; but European considerations have prevented an official declaration of unity of aspiration with the United States.

While couched in terms of diplomatic courtesy, the words of both King and President cannot be otherwise construed than as a notice to European peoples that the two most powerful nations in the world, as one in a determination to oppose all measures provocative of future wars. And undoubtedly in both instances these potentates voice the rooted sentiment of the better elements among their nations. It is because popular sentiment is infinite and based on firm foundations (as President Coolidge intimates) that both feel themselves at liberty to speak so frankly.

There may be those who hold that in promulgating good understanding between the Anglo-Saxon nations, the best guarantee of the peace of the world, the British Government is unfairly ignoring the functions of the League of Nations, of which the British community of nations are members, while the United States is not. But the declaration is based on a sense of realities. Everyone concerned for the well-being of the human race and the future of civilization desires that the League succeed; but so far, in too many important instances, it is clear that the League has yet to win popular sentiment in the support of its aims and purposes. The League has nations in its membership which show no real intention of being imbued with that new orientation in favor of permanent peace, essential to its complete success. It is to be hoped that the day will come when all the civilized nations of the world will combine to make the purposes of the League their own in spirit and in letter. In the meantime, the hope for peace lies with those peoples in whom pacific ideals have the force of religious and patriotic sentiment. Of the best elements in the British Empire and the United States, that is true. It is to be trusted that the recent interchange of Anglo-American amities is but a step forward toward a world, which shall no longer be divided by barriers of hate, but unified by avenues of mutual respect.—From the Toronto Saturday Night.

Waste Paper Waits

A new building material, called Rona Plank, has been invented by a Swedish engineer, Mr. G. R. Rosenqvist.

The plates—says an Exchange message from Stockholm—consist of waste paper and clay, which are cemented together by sulphate.

All these substances can be produced cheaply. It is contended the price of this building plate will be cheaper than any other building material.

THE HOODOOS, JASPER NATIONAL PARK

Jasper Park Lodge, in Jasper National Park, Alberta, is ideally situated as a convenient centre from which to climb hoodoos, traverse trails and motor roads, or embark on fishing and hunting expeditions; while golf, tennis, boating and bathing are right at its door.

For those who have just a short time to spend in the park there are cities and miles of motor roads through winding valleys and up mountain grades, along the shores of swift rivers and past quiet lakes, to mountain, glacier and canyon.

Towering above all other peaks in the vicinity is Mount Edith Cavell, its crown of snow reaching a height of 11,933 feet. From Jasper or the Lodge Mount Edith Cavell is in full view, but it is only by travelling the eighteen miles to Lake Cavell, nestled at the foot of the mountain, that one can really see all the wonders of this new famous mountain named for that brave British nurse, Edith Cavell, heroine of the Great War.

The peculiar formation of a glacier on the side of Mount Edith Cavell adds to the interest of the place. In a cirque between the mountain and the shoulder extending to the north is a hanging glacier covering about a third of a square mile. As ice falls about three hundred feet wide compacted thin with another glacier five hundred feet below, the irregular shape of which extends along the foot of the ridge for more than a mile. This piece of ice presents the form

of an angel with outstretched wings and has been aptly named "Glacier of the Ghost." At another point on the mountain a combination of rock and snow forms what appears to be a side view of the head of a turbaned oriental knight. In photographs taken from Clark Peak this formation is plainly discernible.

The road to Mount Cavell is along the valley of the Athabasca River, Whiteters and Portal Creeks, continuing across the historical Astoria River, which it follows in a southwest direction at the same time climbing the lower slopes of the mountain and finally reaching the shores of Lake Cavell. Many stops should be made en route to view such interesting features as the natural hoodoos with their flat stone hats just along the slope below the road.

Half an hour by motor from Jasper Park Lodge, with motor-like lakes reflecting the rugged outlines of forest and mountain for miles past, brings one to Maligne Canyon. The scenery along this gradually ascending and winding roadway is unsurpassable. Striking innumerable little lakes, each of a different hue from the light yellow of Ocho Lake to the opal-like coloring of Lake Edith with its sandy beach for bathing, the road winds round above the Athabasca Valley and thence to Maligne River close to the canyon.

Following the rocky path of the Maligne River for a short distance one comes to the mouth of the canyon through which great rushes of

water have been passing for many hundreds of years wearing away the rocks to a depth of two hundred feet in places. The canyon is a mile and a half long and is so narrow and irregular that in many places it is impossible to see the river flowing along far below. The water enters this huge crevice with a fall of seventy-five feet and goes chubbling through with a sullen roar.

Along the sides of the canyon are huge pot-holes, testifying to the velocity of the water and its correlative quality during the centuries. Near the top are great dents in the rock worn smooth and now covered with moss, and on shelves of rock fifty feet or so below the surface are evergreen lighting for life with barely a foothold in the rock.

Plainly discernible from the rustic bridges built across the canyon are that the falls and river below may be viewed with safety, are stretches of rock wall beautifully var-colored, and where the river cannot be seen in the dark cavern below it sends its rumbling message to the top.

The mystery of Medicine Lake and the subterranean stream that joins the river below Maligne Canyon is intensely interesting and the rock formation around the lake is well worth the journey of ten miles from the canyon to see.

Canada's most northerly national park is fast becoming one of the most popular playgrounds of the Dominion and every tourist who visits there becomes an agent advertiser.

with the Author)

(Continued)

Descending the southern slope of the hills, she recollected the directions she had written on the piece of birch bark. Half a mile to the south of the deep decline, and running parallel with the range of hills from east to west, ran the Moose Mountain trail, which was used at that time as the main highway as far west as the Wood Mountains. She determined to drop her note in the vicinity of this trail, with the hope that some transient traveller, or search party, would pick it up. She felt confident now, after hearing her father's voice, and an answering call in reply, that by daylight a rescue party would be on their trail. Secretly taking the note from her pocket she awaited her opportunity. As they approached the trail she slightly retarded the speed of her horse to escape observation. As she did so, she quickly dropped it directly over the trail. Then, turning her head, she had the satisfaction of seeing its lighter shade dimly outlined against the darker soil of the trail behind.

During the darker hours of the short June night the cavalcade continued on its course with a steady lops till the first streaks of dawn commenced to show in the northeast. No stop was made, nor was there a word spoken, except an occasional gruff order from the leader as they covered mile after mile of open prairie. At dawn a halt was made at a stretch of prairie, broken by soughs, around the edges of which scrub poplars and willows grew. Here the men watered their horses, and, dismounting for a time, allowed them to graze on the long sough grass. Here, also, her escort released her from her bonds and allowed her to dismount. He gave her a couple of hard biscuits and a piece of dry pemmican to eat, and told her that she was at liberty to walk around within the confines of the scrub—a relaxation which she was in condition to appreciate after her long ride.

An hour's rest and the journey was resumed. This time the unnecessary precautions of tying her to the saddle were not taken. It was a relief to her to be thus allowed greater freedom of action. Her horse, however, remained hitched to the saddle horn of the leader, who evidently considered this sufficient security against her escaping, she having no knife nor other weapon with which to cut herself free.

As daylight was now well advanced she was able to size up the gang into whose hands she had fallen prisoner. The band consisted of four men besides the leader. Each man led two horses together with the horse he himself was riding. Among them she recognized her father's four horses. Two of the men were half breeds and two besides the leader were whites. They were all well

armed with revolvers slung to cartridge belts around the waist. Each man had also a rifle slung to his saddle. In appearance they were not prepossessing. This was a fact that offered little encouragement to the girl in her present plight, should she be forced to call on them for assistance and protection against the evil designs of her immediate escort. She entertained no illusions as to her probable fate at his hands, and she shuddered at the thought of the consequences of that fate, should no chance of escape open to her within the next twenty-four hours. Her father's voice calling to her in the darkness and the answering call in reply gave her a measure of assurance that a rescue party would soon be following close on the trail of the desperadoes. She, however, feared the consequences of an open encounter between a rescue party and the outlaws. But, with the optimism of youth, and the courage born of her western experiences, she determined to wait and take advantage of such chances as fate might put in her way. In her present plight her case seemed hopeless, but time was in her favor and she determined to take advantage of the accidents of chance.

Those were the thoughts that occupied her mind while travelling the remaining distance to the Souris River. About mid-forenoon there opened up before them the vista of the Souris Valley. This valley forms a depression in the level prairie about two hundred feet in depth and about half a mile to a mile wide. It follows like a river an irregular winding course from west to east. About two hundred feet below the prairie level a stretch of level land a few hundred yards in width forms the bottom of this valley. This is bounded on both sides by the steep embankments, rising in many places, like sheer vertical cliffs from the level bottom. This narrow irregular stretch of bottom land is broken by the zig-zag windings of a small stream that lazily winds its snake-like course, meandering from side to side within the confines of the deep valley. This is the Souris River. A small thread-like stream is all that is left to remind the present time of the once mighty river, whose irresistible currents ploughed this wide channel through the crochets formation that in ages past confined it within its deeply eroded embankments.

No time was, however, wasted by the outlaws in contemplation of the scene that opened up before them. Following along the brow of the hill for a few hundred yards, the riders in the lead turned to the right and disappeared down the side of the valley. A steep and narrow path led down the decline by which the horses were led in single file. This path followed a winding course down the steep side of the hill to the level ground below. When they reached the level bottom land, they again turned sharply to the right along a path that hugged closely in to the overhanging bank. This they followed for about a mile, till they came to a cove, or recess, in the side of the embankment. Here on a small grassy plot, well protected on all sides from view, the band halted. Dismounting, they tethered their horses in the shelter of the underbrush and trees, where all seemed to be familiarly at home.

The location seemed an ideal spot for a secret camping ground. The high banks formed a triangular shaped enclosure, which in front and along the sides, was well protected from view by a heavy growth of scrub poplars and willows. It comprised about half an acre of level grassy ground, in appearance a sheltered grove. On the near side of this open space was a tent, showing that it had been used by them on previous occasions. This was evidently the secret tent, and the spot where they intended to spend the day and the first part of the coming night preparatory to making their intended dash across the International boundary in the early hours of the next morning.

Regarding their intentions as to this she was not left long in doubt. For, no sooner were the horses dismounted and the two half breeds sent out to act as sentinels, than the leader, or "Pete," as he was called by his associates, came up to her and told her that the tent was reserved for her use. He suggested that she take a good rest and sleep, as she was going to have a strenuous day's ride ahead of her.

For the first time she had a good look at her captor. A face that in its natural condition would have been by no means inviting for cheering, was disfigured by an ugly scar across his left cheek. This vivid scar gave his face a sinister expression, which, added to his leering looks, inspired her with both fear and apprehensions of his evil designs. It was a face that was by no means expressive of humane feelings. His deep penetrating eyes, his firm set square jaw, his compressed lips, expressive of determination and cruelty, gave her little promise of sympathy or mercy. Showing the first signs of fear or agitation since her capture, she exclaimed: "What are you going to do to me? Where are you taking me? You know you have no right to treat me like this. Why do you not let me go back home? Are you not satisfied with the theft of our horses? Why do you want to add to horse stealing the crime of kidnapping and perhaps murder? For I swear to you, if you attempt to harm me in any way, either you or I shall die in the attempt."

"Ah," he said, "you have some spirit in you, eh? I have busted bronches that have killed broncho busters, and if I have to I'll bust you and tame you to do what I want you to do. You'll have to change your mind on that fightin' stunt my young 'un. Be sensible, and cut out the fightin' stunt, my young 'un, and you'll come in no harm. You stay around that tent like a good young 'un and you'll get no hurt."

Assured of the extent that no immediate harm threatened her she retired to the tent, and remained there during the entire morning till late afternoon. The day's proceedings were uneventful. While she remained within the tent, the greater part of the day, she none the less kept a sharp lookout on all their doings and movements. She was conscious of the fact that, while she was apparently free to move about, the leader kept a strict watch upon all her movements. The three men, and particularly the leader, remained in close proximity to her during the entire day. With the object of diverting suspicion and causing them to relax their vigilance, she assumed an air of indifference as to their movements and her surroundings.

She was convinced that any plan of escape would have to be carried out during the few hours of darkness before a start was made in the early morning. Towards evening she came out of the tent with the object of sizing up her surroundings and take mental note of the lie of the land. The sheer steepness of the embankment prevented all possibilities to escape to the rear. The only avenue open so far as the nature of the ground permitted was to the front into the open valley, or along both sides through the brush along the foot of the hills. But escape in either of these directions was pretty well cut off by the men, who kept strict guard over her and whom she would have to pass in making an attempt to escape by that way.

After taking a stroll around the tent and its vicinity, she sat down on the grass to think out her plans. The only feasible way of escape rested on her hopes of being able to slip away in the darkness, and, by hiding in the underbrush, remain concealed there, and await the coming of a search party. Indefinite as her scheme seemed to be, she decided to take advantage of such chances as the darkness of night would offer. She knew that the leader of the gang was the only one of the men who was aware of her sex, as during the day she had overheard the other men referring to her as "the boy." Conscious of this fact she surmised that it was his design to keep her identity in this respect a secret from his companions. In order to succeed in this, she concluded that he would devise means so that they would be kept at a distance from her.

Keep Your Hands Soft and White With Cutsi

The daily use of this Soap, with occasional touches of the Ointment, is very effective for keeping the hands soft and smooth. For red, rough or sore hands: On retiring wash in hot water and Cutsi Soap, dry, and rub in Cutsi Ointment.

See Mr. Simpson's ad. in this issue. Sold throughout the Dominion. Canadian Agents: Toronto, 144 St. Paul St. W. Montreal, 144 St. Paul St. W. Quebec, 144 St. Paul St. W.

You Can't Beat Tanlac Says Alberta Citizen

**"The Tanlac Treatment
Made Me Look And Feel
Like A Different Man,"
Says Petro.**

"The Tanlac treatment has made me look and feel like a different man," is the positive statement of H. G. Petro, well known citizen of Okotoks, Alberta, Canada.

"Before taking Tanlac I was sorely troubled with indigestion, gas bloating and a tightness in my chest that made me short of breath. My appetite was gone, my circulation poor, and head-

aches and dizzy spells would strike me most every day. I also had a bad swelling in my leg.

"Three bottles of Tanlac put me in A-1 condition in every way. I have a rousing appetite, sleep like a log and am rid of all my troubles, even the swelling in my leg. Incidentally I have gained so much weight that I am too big for the clothes I wore before taking Tanlac, and am feeling fine. You can't beat Tanlac."

Tanlac is for sale by all good druggists. Accept no substitute. Over 44 Million bottles sold.

Take Tanlac Vegetable Pills.

In the early twilight she arose from her reclining position on the grass, and assuming an air of indifference, she sauntered round to the rear of the tent. As she did so, her foot struck against a small boulder stone, which, as if acting on inspiration, she secretly slipped with her toe under the fold of the tent. She had a weapon of defense, and she conceived the notion that this primitive weapon might serve a useful purpose if forced to put up a fight. Entering the tent a few minutes later, she eagerly picked up and concealed this small rock under the thick grass within. Then she calmly ate of the biscuits and pemmican with which she had been provided.

As night was falling the two men who had been sent as outposts, returned to camp and reported that all was clear, and no sign of anyone in the vicinity. As they were now under the protection of darkness, they took their horses and watered them in the river nearby, and then tethered them on the grass on the moss open ground. When this was done the men made preparations for the night's camping. Blankets were produced from packs and spread, and saddles arranged for pillows. She noted with satisfaction that they arranged their beds towards the farther outskirts of the grassy plot, about forty yards away from the tent. The leader, however, did not join in these preparations. After the rest of the men had arranged their beds, he picked up his saddle and pack and brought them towards the tent. He deposited them in front, and, taking out a blanket, he passed it into the tent and said, "Here, take this blanket over and have a good sleep, for you are going to have a long ride tomorrow. We are to start before daylight." He then spread his own blanket on the ground in front, and sat down reclining against the saddle. It was evident to her now that it was his intention to keep guard over her himself during the night. It was a matter of infinite relief to her, however, that he did not take the precaution to bind her up as added security against escape. To that extent Providence seemed to favor her.

A Wise Policy

Man's home companion is a pipe or cigar, and the wise wife encourages him to smoke.

What Can a Little Chap Do?

What can a little chap do?
For his country and for you?
What can a little do?
He can fight like a Knight.
For the Truth and the Right—
That's one good thing he can do.

He can shun all that's mean.
He can keep himself clean,
Both without and within—
That's another good thing he can do.
He can be brave
Against everything base.
And the trace will be seen
All his life in his face—
That's a very fine thing he can do.
He can look to the Light,
He can keep his thoughts white;
He can fight the great fight,
He can do with his might,
What is good in God's Sight,
These are excellent things he can do.

Though his years be but few,
He can march in the queue
Of the Good and the Great,
Who battled with fate
And won through—
That's a wonderful thing he can do.

And—in each little thing
He can follow the King,
Yea—in each smallest thing
He can follow the King—
He can follow The Christ, The King.
—Field Scout.

Lighthouse Keeper Rescued

After being marooned in the Longships Lighthouse at Land's End at the entrance to the English Channel for 17 weeks, the lighthouse keeper and his two assistants have been rescued and brought in land. The men had been cut off from Land's End since early in September.

ASPIRIN

Beware of Imitations!

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-three years for

Colds Headache
Toothache Lumbago
Neuritis Rheumatism
Neuralgia Pains, Pains

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocetate of Salicylic Acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Has His Limitations

A man that brags "foot allus tellin' do truth," said Uncle Eben, "generally 'pears to find it easier to tell it about somebody else's business than 'bout his own."

HELP FOR YOUNG WOMEN

**Mrs. Holmberg Tells How
Lydia E. Pinkham's Vegetable
Compound Helped Her**

Viking, Alta.—"From the time I was 15 years old I would get such sick feelings in the lower part of my abdomen, followed by cramps and vomiting. This kept me from my work (I help my parents on the farm) as I usually had to go to bed for the rest of the day. Or at times I would have to walk the floor. I suffered in this way until a friend induced me to try Lydia E. Pinkham's Vegetable Compound. I have had very satisfactory results so far and am recommending the Vegetable Compound to my friends. I surely am glad I tried it for I feel like a different person now that I don't have these troubles."—ORELIA HOLMBERG, Box 92, Viking, Alta.

Letters like this establish the merits of Lydia E. Pinkham's Vegetable Compound. They tell of the relief from such pains and ailments after taking it.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and today holds the record of being the most successful remedy for female ills in this country, and thousands of voluntary testimonials prove this fact.

If you doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for Mrs. Pinkham's private test-book and learn more about it.

CUTSI

Minard's eases inflammation, soothes and heals cuts and bruises.

W. N. U. 1512

SINGAPORE PLAN WAS REFERRED TO DOMINIONS

London.—J. H. Thomas, colonial secretary, in winding up officially the debate in the House of Commons on the government's abandonment of the proposed Singapore naval base in which the government was sustained by a majority of 74, said: "What are the facts regarding consultation with the Dominions? The day the Imperial Government decided to spend no more money in Singapore they wired that decision to the Dominions. Not only was it on record, but certain Dominion ministers, without mentioning names, were in this country when we came into power and discussed the question of the Singapore naval base with us."

"So do not be under any misunderstanding concerning the government not knowing the views of the Dominions on the matter. I want to put it to Friend Amery (Lieut.-Col. L. C. Amery, former First Lord of the Admiralty). Does he seriously suggest that it is insulting the Dominions for the government to take the course it is taking in this matter?"

Mr. Thomas said he was quoting Canada as saying "quite distinctly" at the conference: "So far as we are concerned we express no opinion."

The colonial secretary also quoted a message from the Australian Labor party to the British Labor party as follows: "We are entirely opposed to Premier Bruce committing Australia to the Singapore scheme."

The New Zealand Labor party, Mr. Thomas added, wired: "We heartily congratulate your government on dropping the Singapore proposal."

Concluding, the colonial secretary said: "When the British public are told that there is a unanimous Australian and New Zealand opinion on the Singapore scheme as they have been told today, they are entitled to hear the other side."

Cannot Speak Too Highly Of Your Medicine

So Says Mr. and Mrs. J. Armstrong After Using Dodd's Kidney Pills

Ontario lady who suffered from neuralgia, backache and headache, tells of Dodd's Kidney Pills.

Sprucedale, Ont. — (Special). — "I thought I would write and tell you how much your Dodd's Kidney Pills have helped both my husband and myself. We have used several boxes and they have helped us wonderfully. I cannot speak too highly of your medicine."

This testimonial comes from Mrs. T. Armstrong, of this place—well known and highly respected resident. The reason Dodd's Kidney Pills have come to occupy such a prominent place in the family medicine chest, is that so many of the ordinary everyday ills come from sick kidneys. Rheumatism, Lumbago, Backache, Urinary troubles, Diabetes and Heart Disease can all be traced directly or indirectly to sick kidney. Insist on having Dodd's, the Kidney Pill your neighbors use.

Thinks Labor Party Safe
London.—Premier MacDonald, in the course of a talk with Prof. Alberto Salomon, Peruvian minister of foreign affairs, who is visiting London, made it known that he is gaining confidence daily that the Labor party will be in power for some time. He was sure that when a referendum was put to the country the Labor party would be returned to power with a substantial working majority of their own.

Healthy Liver Healthy Life

Your liver—healthy or clogged, active or sluggish—makes all the difference between a vigorous, cheerful life and low spirits and failure. To combat a stubborn liver, overcome constipation, dizziness, biliousness, indigestion, headache and the blues there is nothing so good as Carter's Little Liver Pills. Fully vegetable.

Small Pills—Small Dose—Small Price

W. N. U. 1519

Large Expenditure Necessary For Port Nelson Harbor

Ottawa.—An expenditure of approximately \$20,000,000 will be necessary at Port Nelson, the proposed terminus of the Hudson's Bay Railway Company in order to accommodate ten 7,000-ton ships declared Hon. G. P. Graham, minister of railways, in the House. Of the total amount \$4,000,000 is the estimated cost of a 4,000,000 bushel elevator and \$400,000 the cost of the railway yard and terminal buildings. The lighthouse crib at the entrance of the harbor is given as costing \$300,000.

Many Hebrideans Coming

Proposed to Settle Homesteaders on Five Acre Plots Near Urban Centres

Ottawa.—Plans for the immigration to Canada of another large party of Hebrideans coming under the same auspices as those who arrived last spring are being worked out and official advice given to the department here.

The scheme at present being evolved is on new lines, however. It is not proposed that the immigrants homestead but, rather, that five acre plots of land be secured adjoining urban centres—probably in Alberta—and devoted to gardening.

Another part of the plan is that farmers be asked to give an acre of ground to the newcomers upon which a cottage would be erected, the immigrant contracting himself for labor on the landlord's farm.

The society which is promoting this immigration, is giving financial assistance for the erection of cottages while, it is said, a grant has also been secured from the British Government. Several hundred are expected early in the season.

Famous Comedy Success "Lightnin'"

Will Inaugurate Its First Canadian Tour at Winnipeg

After a wait of more than four years, during which it has shattered all theatrical records in New York, Chicago and the principal cities of the United States, Canadian playgoers are to see "Lightnin'". With Thomas Jefferson, Bessie Bacon, Charles E. Evans and a special cast that John Golden will send to London next summer, the famous comedy success will be presented at the Walker Theatre, Winnipeg, beginning Monday, April 14. Matinees are announced for Wednesday, Good Friday and Saturday and on account of the expected rush for seats, mail orders will be accepted at once.

Mr. Jefferson is a son of the late Joseph Jefferson, who immortalized "Rip Van Winkle". Miss Bacon is a daughter of the late Frank Bacon who wrote and starred in "Lightnin'"; and Mr. Evans is a veteran character artist of pleasant memory in "A Parlor Match" and other farces produced by the late Charles K. Hoyt. The cast is of real all-star distinction and its visits to the principal cities of the Canadian northwest are likely to be a series of ovations. The play is rated as the finest blending of romance, fun and gentle pathos that the stage has known since "The Music Master." Its thrilling courtroom scene is said to rank with the classics in realism and skillful construction.

The prices for "Lightnin'" in Winnipeg will be as follows: Nights, Orchestra, first eight rows, \$2.50; next seven rows, \$2; balcony, \$1.50; Matinee, first three rows, \$1; balcony, \$1.50; next three rows, \$1; balcony, \$1.50; Gallery (reserved), 50c; Friday and Saturday matinees, Orchestra, \$2, except last four rows, \$1.50; balcony, six rows, \$1; balcony, 75c; Gallery (reserved), 50c. For the Wednesday matinee a special bargain scale has been arranged, with the Orchestra priced at \$1.50 except the last four rows, \$1; balcony, six rows, \$1; balcony, 75c; Gallery (reserved), 50c. Add ten per cent. tax to these prices.

The box office sale will open Friday, April 11, but mail orders will be given precedence and tickets will be mailed promptly to purchasers when orders are accompanied by remittance payable to the Walker Theatre, including tax. An addressed stamped envelope should also be enclosed to insure safe return of tickets.

"Lightnin'" will also be presented in Saskatoon, Regina, Moose Jaw, Medicine Hat, Lethbridge, Edmonton and Calgary on dates to be announced later.

Limerick Looked Good

Moose Jaw.—An Irish immigrant who arrived at the C.P.R. station here, inquired the whereabouts of Limerick, Sask., also the train service to that point. "It's the nearest thing to Ireland I can find either looking at the map," he told officials in broad accents. "O'm going to try to get a job there."

PLAN TO MAKE A CLOSE SURVEY OF BRANCH LINES

Ottawa.—When the bills which provide for the construction of the Canadian National branch lines get to the Senate from the House of Commons, it is intimated that, in place of being discussed in detail in the Chamber they will be referred to the Railway Committee. This was intimated in Senate circles here.

While the course is an unusual one to be pursued in relation to any government bill, such a procedure would be regular, and the purpose in view would be to have each project investigated. Officers of the government or of the Canadian National will, it is said, be called on to justify each line by the production of data showing that it has the reasonable prospect of being a paying proposition. Duplication of lines to the same or adjacent territory will also be avoided, according to Senate plans. As separate bills are being prepared for each line, all or a part may pass.

Recognition of Soviets

Russian Government Agents Receive Acknowledgement From Premier King

Ottawa.—"In the best interests of both countries, I have the honor to represent that Canada is prepared to recognize the Union of Soviet Republics."

This is the reply which Rt. Hon. W. L. Mackenzie King sent to A. Yashkov, Montreal, agent in Canada for the Russian Soviet Government, who asked "whether the de jure recognition of the Union of Soviet Republics proclaimed by His Britannic Majesty's Government on February 1 last, comprehends recognition by Canada."

The two letters were given out by Mr. Yashkov in an interview.

It is generally understood here that the formal acknowledgment of the prime minister really adds little to the status in Canada of the Russian Government, which has been free to trade here for some time and which was formerly recognized several weeks ago in Ottawa, when M. Yashkov and his party were received by the acting premier and assured of the Canadian Government's cordial good-will in any trade negotiations the Russian agents might wish to enter into with Canadian citizens.

Saskatchewan Opposition

Will Hold Convention in Saskatoon on August 24th

Moose Jaw.—Members of the Opposition party in the provincial legislature, following a meeting in Moose Jaw, came to formal decision to hold a convention in Saskatoon, August 5.

Those taking part in the conference were: Harris Turner, M.L.A., Saskatoon; D. H. McDonald, South Qu'Appelle; W. H. Harvey, Kindersley; Sidney Bingham, Wilkie; and W. J. F. Warren, Nekebeek, who is M.L.A. for Thunder Creek. Representatives from Milestone constituency also attended the conference.

Japanese Fishermen

Ottawa.—A recommendation that there be no reduction in the number of Japanese fishermen issued to Japanese fishermen for the present year, in British Columbia, was adopted by a meeting of the House of Commons in committee on Marine and Fisheries. During the meeting W. G. McQuarrie, Conservative, New Westminster, suggested extending the close season for sockeye salmon on the Fraser, by two weeks, but no action was taken on this matter.

Postal Employees May Go On Strike

Ottawa.—Representatives of the Canadian Federation of Postal Employees are dissatisfied because they have found out that the Civil Service Commission cannot deal with postal employees in revising salaries without reference to other employees in other departments doing similar work, and are again referring to the strength of the strike vote, which they claim is increasing. Revision of salaries in all the departments could not be completed in less than a year.

New North Pole Trip

Projected Expedition By a Young Icelandic Is Reported

London.—A projected new expedition to the North Pole is reported. The Westminster Gazette says: "A young Icelandic, Alghorn, is starting for the Arctic early in May on a preliminary trip to Nova Zembla and Franz Josef land. He proposes to spend six months exploring this section, ending his trip in New York in October."

The party will number 10, including three scientists. The expedition is a prelude to one in 1925 under Alghorn's leadership, the objective of which will be the North Pole.

COULDN'T SLEEP HEART WAS BAD NERVES A WRECK

Mr. H. A. Reid, Upper Macquodoch, N.S., writes:—"I am very thankful for the benefit I have received by using Milburn's Heart and Nerve Pills."

When I came home from overseas, in 1919, my heart was very badly affected by concussion, and my nerves were a dreadful wreck. I was very short-winded, and could not possibly sleep at night. In fact, I was in such a condition I felt as if I did not wish anyone to speak to me. I thought I would try Milburn's Heart and Nerve Pills, and before I had taken two boxes I could enjoy a good night's rest as well as anyone.

There are lots of returned men who are suffering the same as I did, and I feel sure if they would only try Milburn's Heart and Nerve Pills they will receive the same relief that I have."

Price 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Fire in Tokio Suburb

Tokio.—Six hundred houses were burned in a fire which swept Yoshiwara, a suburb of Tokio. Twenty persons were injured. Five thousand are homeless.

Warships For Australia

Melbourne.—Federal Premier Stanley M. Bruce, announces the immediate construction of one light cruiser for Australia and one in England for the Commonwealth.

PROBABLE DATE SUGGESTED FOR BUDGET SPEECH

Ottawa, Ont.—The wish of the government to expedite business because of the late opening of parliament, together with the uncertainty in business circles that precedes the budget announcements, suggest the likelihood of the budget speech before parliament takes recess for Easter on April 15. Possibly budget day may be the 15th, but the acting minister is not in a position to make a definite announcement.

In speaking to the manufacturers of agricultural implements a few days ago, the Premier denied any purpose of singling out their particular industry in any tariff changes that are made. He spoke of the reference in the throne speech, to taxation on implements of production in connection with the development of national resources.

While the removal of the sales tax on all such implements might, really, conform to the implication of this announcement, the gossip and expectation in ministerial circles is that, apart from the removal of this tax, the tariff will be lowered on agricultural implements, and saw mill and mining machinery.

Many Leave Canada

More Settlers' Effects Are Exported Than Imported According to Figures Presented

Ottawa.—The value of settlers' effects imported into Canada which is frequently used as a measure to estimate immigration, still continues to decrease, while there is also a continued increase in the settlers' effects exported. For the twelve months ended with February, the value of settlers' effects imported into Canada was \$5,914,222, while for the year ended with February, 1923, it was \$5,293,576, and for the similar period ended with February, 1922, it was \$4,144,104. On the other hand the figures for exports of settlers' effects for the twelve months just closed were \$10,712,761; for the year ended February, 1923, \$7,977,610; and for February, 1922, \$6,275,826.

Heavy Compensation Bill

Dublin.—President Cosgrave is asking the Dail Eireann for an appropriation on account for the coming year totalling \$21,000,000. Of this amount \$2,500,000 is for compensation of property losses suffered during the period of disorders.

Will Continue Mineral Rights Tax

Edmonton.—Hon. R. G. Reid, provincial treasurer, in concluding the debate on the budget in the legislature, declared that there was no intention on the part of the government to discontinue the mineral rights tax.

Canada's Part in Power Conference

1. **Quebec-Champlain hydro-electric power system** of the Hydro-Electric Power Commission of Ontario on the Niagara River near Niagara Falls, Ontario, Canada, as it will appear when completed with the full installation of 200,000 h.p. There were six units of 33,333 h.p. each in operation in 1920 delivering power to the Commission's Niagara system. Two similar units will be added during 1924.

2. **Great storage dam** on the upper waters of the St. Maurice river, Quebec, Canada, built by the Quebec Steam Commission for the regulation of flow of the St. Maurice for power purposes. The operation of the reservoir which has an area of 200 square miles and a capacity of 100 billion cubic feet has more than doubled the minimum flow of the river at Shawinigan Falls with a corresponding benefit to the power investors.

3. **Hydro-Electric development at Cameron Falls** on the Nipigon river, Ontario, of the Hydro-Electric Power Commission of Ontario, Canada. The plant has an ultimate designed capacity of 75,000 h.p. of which 25,000 h.p. is now in use, power being transmitted to Port Arthur and Port Williams. The Com-

mission are installing an additional 25,000 h.p. during 1924.

4. **Hydro-Electric Development of the Manitoba Power Company Limited at Great Falls** on the Winnipeg river, Canada. The initial installation of 5,000 h.p. was brought into operation during 1923, the power being sold to and distributed by the Winnipeg Electric Railway Company Limited. It is proposed to add a third unit of 25,000 h.p. in 1924. The ultimate designed capacity of the plant is 100,000 h.p.

Canada will play an important part in the first World Power Conference that is to be held in London, England, from June 28th to July 12th, and this because after the United States, she possesses greater potential water powers than any other country and because in point of per capita production of electric power she stands almost at the head of all nations, her production, in this respect being three times greater than that of the United States.

This is rapidly becoming the electric age, a fact which the impending Conference, which is being held under the auspices of the British Electrical and Allied Manufacturers Association in co-operation with several of the most technical, scientific and industrial institutions throughout the world, emphasizes greatly. The Canadian committee consists of the leading members of the electrical engineering profession with Dr. Charles Campbell, deputy Minister of Mines as chairman.

So far as Canada is concerned the hydro-electric development is a two-century development. A quarter of a century ago it was very little hydro-electric development in Canada. In 1910 the turbine installation of water power plants in Canada was but 245,000 h.p.; in 1915 it was 2,078,000 h.p.; in 1920 it was 2,453,000 h.p.; in 1923 it was 3,228,000 h.p. Next year it is expected to be 4,000,000 h.p., the indications being that 5,000,000 h.p. will be reached by 1928.

Canada is very fortunate in that her large water powers are located comparatively close to the centres of her industrial life. When it comes to ability to use her water powers she is immeasurably better off than the United States, 70 per cent of the latter being in the Western states, remote from industrial centres. Within a radius of 300 miles of the Long Sault rapids on the St.

Lawrence river, there are available water powers exceeding 9,000,000 horse power. As it is through the development of water power that other operations are made cheaper, capital for it can be more readily secured, and it is for this reason that the power-producing industry has progressed more rapidly than any other in Canada during the past few years.

Briefly, the objects of the Power Conference are to consider how the industrial and scientific sources of power may be adjusted nationally and internationally; by considering the potential resources of each country in hydro-electric power, oil and minerals, by comparing experiences in the development of scientific agriculture, irrigation and transportation by land water and air; by conferences of civil, mechanical, marine and mining engineers; by consultation of the consumers of power and the manufacturers of the instruments of production, by discussion on the financial and economic phases of the industry, by conference on the possibility of establishing a permanent World Bureau for the collection of data, the preparation of inventories of the world's resources and the exchange of industrial and scientific information through the representatives of the various countries.

It will be seen then, that the Dominion's part in the Conference cannot be a small one and that through the dissemination of knowledge of her resources she stands to gain considerably. It is interesting to note in this connection that for every new power scheme which calls for large investment, the money comes chiefly from abroad. Indeed it is probably that since 1918 several hundreds of millions of dollars have been secured in this way and it is impossible to overestimate the importance of water-power development as a means of attracting capital to Canada.

GUS ZUCHT,

High Price of Whisky

Milk Said to be Taking the Place of Hard Drinks in Glasgow

Milk is taking the place of whisky as a workman's beverage to such an extent that Glasgow publicans are gradually transferring to the milk business. The principal reason for the change is said to be the high price of whisky, workmen being unable to afford 16 pence for a drink.

Some years ago publicans paid from \$50,000 to \$100,000 for the "good will" of a licensed house and now they find these valueless.

Hence small milk shops are being opened to take the place of the abandoned licensed places.

CHILDHOOD CONSTIPATION

Constipated children can find prompt relief through the use of Baby's Own Tablets. The Tablets are a mild but thorough laxative which never fail to regulate the bowels and stomach, thus driving out constipation and indigestion, colds and simple fevers. Concerning them Mrs. Gagnard, Dalkeith, writes: "Baby's Own Tablets have been of great benefit to my little boy, who was suffering from constipation and indigestion. They quickly relieved him and now he is the best of health." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Cattle Shipments

Noel Buxton, minister of agriculture, replying in the British House of Commons to a question, stated that from April 1, 1925, to March 8, 1926, there were 23,183 cattle shipped as stores to England from Canada. Of these 37 died or were killed during the journey from the Dominion, 10,896 were slaughtered at the landing port, and 17,299 or 81 per cent. were placed on the land.

NORMAN E. TRIMPER

THIS MAN TELLS YOU HOW TO KEEP FIT!

Beck River, N. B.—"My back was so bad I could hardly work. I was always tired out and had no ambition; was nervous and dizzy, and everything seemed to worry me. I also had terrible pains in my right side. I felt badly for about eighteen months, and could not do any work as it should have been done. I tried several doctors, and also bought about \$25.00 worth of put up medicines, but I found no relief until I took Doctor Pierce's Golden Medical Discovery and Doctor Pierce's Anemic (and) Weak Tablets. I have taken two bottles of the Discovery, and four of the Anemic Tablets, and can say that I feel as well as I have felt for the last ten years. I advise any sufferer to give Dr. Pierce's remedies a fair trial. I cannot recommend them too highly for what they have done for me and shall be pleased to answer any one who cares to write me."—Norman E. Trimper, R. R. 1.

Obtain these famous medicines now at your nearest drug store, in tablet or liquid, or send 10 cents to Dr. Pierce's Laboratory in Bridgeport, Ont., for trial package of any of his remedies. While Doctor Pierce, President Invalids Home in Buffalo, N. Y., if you desire free medical advice.

W. N. U. 1612

Incubation of Dairy Calves

Dairymen Are Advised to Rear Heifer Calves From Good Stock

A saving of better calves from heavy milking cows kept for producing milk for city trade, was urged at the Dairy Cattle conference recently held in Ottawa. An enormous sacrifice of good dairy stock is said to result from the present practice whereby dairymen in many cases depend upon buying to replenish their herds instead of rearing the heifers from good cows. Cases were instanced of many carloads a year of the very best cows being bought up and shipped out of certain counties in Ontario to replenish commercial milking herds. Under this system the cows no longer produce the progeny they are capable of producing, which is so much needed. It was urged that means be found for inducing milk producing farmers to use improved bulls only, and to encourage the organization of heifer clubs among the boys and girls for taking over and rearing heifer calves.

Women! Dye Faded Things New Again

Dye or Tint any Worn, Shabby Garment or Drapery

"Each 12-cent package of 'Diamond Dyes' contains directions so simple that any woman can dye or tint any old, worn, faded thing new, even if she has never dyed before. Choose any color at drug store."

Getting Back to Peace

A Difficult Task to Get the World Back to Peace Again

Lord Cecil is authority for the statement that there are now 3,750,000 men under arms in Europe, and that this number is only one hundred thousand less than there were before the great war began. And over against the fact of this slight reduction is to be placed the other fact that there are bottled, then, men actually in uniform many millions, of trained and demobilized soldiers. The task of getting this old world to carry on on a peace basis seems a tremendously difficult one, and yet we must keep working away at it. The folly of the present situation is surely evident to every one.—Christian Guardian.

Murdered!

Put right out of business, a whole family not of good honest folks, but of Corns—sore troublesome corns that sting and bite. Putnam's Corn Extract is the only painless sure relief for corns, it never fails, 25c everywhere.

Weakness in the Air

France Takes Lead Over Britain in Air Defenses

In round numbers, but not so round as to be misleading, we have at present about one first-line, or combatant, aeroplane for every ten possessed by France. France keeps about 600 first-line aeroplanes always ready, under the name of the Independent Striking Force, to attack any enemy the instant a war is declared. We have for the same purpose about 50. But France is vastly stronger than we in other aeroplanes which could be converted immediately to the same use—she has some 600 told off to work with the French army. The relative combatant strengths of the two countries in the air are, then, as a thousand is to a hundred. In a conflict we should be in the position of one man fighting ten.—Manchester Guardian.

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own best argument—its own best advertisement. If you suffer from asthma get this time-tried remedy and find help like thousands of others.

Fifty-Fifty

Bogger—"Pierce give a poor old blind man a dime?"
Lady—"Why you can see out of one eye!"
Bogger—"Well, then, give me a nickel!"

Minard's Liniment Relieves Colds

WORLD HAPPENINGS BRIEFLY TOLD

The National Assembly at Athens passed a resolution in favor of the Gluckaburg dynasty and establishment of a Greek Republic.

Disregarding party lines, the House at Washington adopted a resolution to appropriate \$10,000,000 for the purchase of food supplies for destitute women and children in Germany.

The Paris League has received from Syria a harp, the strings of which have been made for 3,700 years. It was unearthed on the banks of the Euphrates.

Because of the continued demand that the body of Nicolai Lesine, the late premier, be kept on view, the Soviet Government has decided to re-embalm it, in order to preserve it permanently, if possible.

Italy's air force has been built up to a point that gives her authorities confidence in her ability to hold her own defensively in this field of military activity, according to the under-secretary of state.

More than 50 claims have been recorded, following the recent strike of high-grade ore in Beaver district, 60 miles north of Reno, N.Y. Many outcrops are leaving for the new camp and considerable development is looked for in the near future.

The funding of France's foreign debt of between eighty to ninety billion francs will be the next move of the government for the purpose of consolidating the position won in the "battle of the franc," and to improve the financial and economic situation generally.

Is Your Nose Stuffed With Cold?

Don't lead your stomach with cough medicine. Send healing medication through the nostrils—send it into the passages that are inflamed with Catarrh. It's easy to get rid of a bad cold, to drive out Catarrh, to strengthen a weak throat by inhaling Catarrhosone. Get Catarrhosone from your druggist today. By using it frequently you keep the air passages free from germs, and thereby prevent many a bad cold. Two months' treatment, \$1.00; small size 50c. Refuse a substitute. By mail from The Catarrhosone Co., Montreal.

Postal Crime Wave

"The crime wave" in the postal service which was growing to an alarming extent is decreasing, says the annual report of the postmaster-general. The report says further that the C.O.D. service for parcels is becoming very popular.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

The first bananas shipped to London could not be sold at any price and were left to rot because nobody would eat them.

SUNDAY SCHOOL LESSON

APRIL 6

THE KINGDOM RENT ASUNDER

Golden Text.—Pride goeth before destruction. And a haughty spirit before a fall.

Proverbs 16:18.

Lesson.—8 Kings 12:1 to 16:23. Devotional Reading.—Psalms 131 and 132.

The Text Explained and Illustrated

I. Jeroboam the Spokesman for the Northern Tribes at the Assembly at Shechem, verses 1-3. On the death of Solomon his son Rehoboam succeeded to the throne, but apparently a year passed before an assembly was called to confirm his success by popular approval. Strange to say, the assembly met at Shechem instead of at Jerusalem, and therefore we may infer that this great gathering was convened by Rehoboam himself. Those tribes had a great grievance to settle; they were determined not to pledge the new king their allegiance unless he agreed to lessen their heavy servitude. Their leader and spokesman in this declaration of independence was Jeroboam, who had been recalled from Egypt. See The Historical Background.

II. The Hebrew Federation of Labor Undertakes to Arise. With the Employer, verses 4, 5. Before they would swear allegiance to Rehoboam, the Northern Tribes demanded from him a promise of relief from the taxation and forced labor that were crushing them. "Thy father made our yoke grievous," they told him: "Now therefore make thou the grievous service of thy father, and his heavy yoke which he put upon us, lighter, and we will serve thee." Rehoboam asked for three days in which to consider the matter.

"The men of good will in all the world must face the task of securing such a method of life as shall give new and larger opportunity to the weak and the poor and those circumstances in economic relationships in all the world. We are all capitalists in the sense that we have the securities of personality. And we must all be laborers in the sense that these securities must be invested if they are to bring us returns." The world as a whole must face the economic and social problem and decide it in the light of a world-wide application of principles of social and economic justice. And here is the greatest task of the twentieth century. It will need all the patience and sober good will of many a nation with a friendly face to accomplish all that is imperative here" (Hough).

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unclean stomach, but this is only a manifestation of their cleansing power, so indication that they are useful. They can be thoroughly depended upon to clear worms from the system.

Guard Against Tuberculosis. Citing the relations between the spread of tuberculosis and use of raw milk from tubercular cows, S. A. Brethens, Progressive, Peterboro, Ont., intends to bring up in the House the question of stricter regulations to protect more adequately the people of Canada from the menace of this most dreaded disease.

Probation Method a Success

Out of a total of 600 men and women who were given a "second chance," instead of a prison sentence, on being convicted of crimes in Toronto and York county between November, 1922, and October, 1925, only 21 failed to make good, according to the Ontario probation department.

Worms in children, if they be not attended to, cause convulsions, and even death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Desire For Peace

Britain only recently slashed her military estimates, and now brings her naval expenditure to a pre-war level. No great power in the world's history has ever evidenced a more sincere desire for disarmament and peace.—Ottawa Journal.

Stony Plain and District.

Meredith Bros. purchased three purchased bulls at the big sale in the City.

Tags Councilors meet in Stony tomorrow.

O O Meach, Cadomin, arrived in Stony yesterday.

Baker Ph Trapp is making rain bread every Wednesday and Saturday.

About 300 bags left Stony on Thursday last, with several farmers claiming they received a close share on the Edmonton price.

With its reputation of marketing up to 400 bags on a Thursday, Stony Plain is attracting some attention from outside points—so much so that an Edmonton buyer was out here this week taking a survey of the situation, with the possibility of locating. With another layer on the job Thursday, competition for the pigs will begin to get keen.

Another mad mishap occurred on evening last week at Rosenthal, when a resident was returning from a neighbor's with a gallon of potatoes. While passing the school house a goat stepped out from a waiting car, flushed a paper, searched the buggy, and confiscated the jug, as it were. To make the incident more provoking John appeared in an Edmonton court and was booked for a 200 buck fine.

Warden School is closed this week.

Mr. E. Pizler is shipping a car of prime beef next week.

The steer Linda Gay Lad, bred by the University of Alberta, was awarded the Grand Championship in the Horsford class last week at Saskatoon Winter Fair.

C Costa, Duffield, shipped a mixed car of stock last week to Edmonton.

Loss provide you with a Life Assurance Policy to suit your particular needs. R. H. Brooks, local agent for The Sun Life Assurance Co.

Court Case

The house-shooting case from Edmonton Bench District, postponed from last week's sitting of the court, was up again Monday. After hearing the evidence for the Crown, Justice Ives withdrew the case from the jury and dismissed the case, and ordered that all costs be paid by the complainant, George Gabel. R B Cragwell appeared for the Crown; H A Macle for Gabel; F W Landy and J A McCaffrey for the defendant.

The celebrated pig race, Yukon Cup, is on the docket at the Supreme Court, Criminal Division at Edmonton this week. Messrs W E Miller, August Meredith and H D Laird were subpoenaed as witnesses.

A Charming Birthday Party.

A very successful surprise party was given by Mr and Mrs John Stahl on March 18, to celebrate the anniversary of the natal day of their daughter Etta.

Friends for distant were taken by Mr Herman Wolf and Miss Elizabeth Webber.

Miss B Goetz assisted the hostess in serving the refreshments.

The birthday cake was cut by the honored Miss Etta Stahl and served with ice cream.

Miss Etta received many lovely and valuable presents to commemorate the occasion.

A very enjoyable program of games was given, for the invited guests who enjoyed themselves to the utmost.

Among those present were: The Misses Nina and Grace Bell, Elia and Mary Weber, Beth Goetz, Beth Armbruster, Stella Ingle, Misses Glen Ashwood, Geo Wolf, Herman Wolf, Will Sturdy, Henry Hinkel, John Uimer and Fred Uimer.

Holburn News.

Another delightful surprise party was given last week at Holburn, when the friends and acquaintances of Mr Chester Kimberley assembled at the Kimberley Ranch and helped him celebrate the twentieth anniversary of his birth. Cards, music and song helped pass a very pleasant evening. There was much fun when the birthday cake was cut and the guests discovered a beautiful surprise in each piece. All left wishing this popular young man many happy returns of the day.

Holburn Local members have just finished a very strenuous campaign for signers for the Wheat Pool among the residents of the district, and succeeded in enlisting a large number, besides the members of the Local.

Seed Grain Corn Fast.

The Provincial Government seed grain cleaning and marketing plant at Edmonton has disposed to date of more than 50,000 bu. of seed, and compares with 16,500 bushels marketed during the 1922-3 season. A great deal of seed is going out to farmers in the province, as well as to points abroad.

Cat One in Concert, Too.

As a reminder to the birds that spring is approaching, some one left a big fat gopher tied to our office door this morning.—Consort Enterprise

Here and There

A dispatch from London, England, states that the Sudan Government, through Capt. E. C. Midwinter, general manager of railways and steamships, Sudan, Africa, has accepted a tender from a British Colonies firm for 120,000 railway ties of Douglas fir. The contract expressly stipulates that the railway ties shall be of Canadian origin.

British Columbia's shipment of water-borne lumber, a previous estimate totalled \$21,707,122 based last year, against \$22,146,000 in 1922, an increase of 91 per cent. This announcement was recently made by the provincial minister of lands and it is a remarkable index of the rapid expansion of the lumber industry in British Columbia.

Under a scheme inaugurated by the Provincial Government it is announced that British Columbia will advance loans up to \$500 a family to settlers from the Hebrides, on condition that the British Government advance a like amount. In view of the present depression in the islands, it is expected that the British Government will co-operate.

Keen interest in all Canadian manufactures and especially in mineral products, wood pulp, textiles, leather and rubber goods, heavy machinery and farm machinery is now manifested by France and Belgium, according to H. E. Tancor of Montreal, who recently accompanied an exhibit of these manufactures on a tour through every important city in those countries. Mr. Tancor believes that the tour will bring great practical benefit to Canada as soon as French currency becomes more stable.

The exterior of the great Canadian pavilion at Wembley has now been completed, and the interior decorations are being finished. The building, according to H. E. Tancor, who has just returned to Canada aboard the Canadian Pacific liner Montclair. The exhibits are being rapidly assembled and everything points to Canada's display being ready in time for the opening of the British Empire Exhibition.

That Canada's culture has nothing to fear from the promised flow of immigration from continental Europe was the message recently delivered by J. Murray Gibson, Canadian author and litterateur, in an address on "Canadian Literature and the Foreign-born" given at Montreal recently. Of all the Scandinavian races contributing to the Canadian population, Mr. Gibson considered the Icelanders to have the highest literary mentality.

More than 15,000,000 bushels of grain have been received at the Government elevator at Vancouver, B.C., from Canadian Pacific Railway cars since the opening of the crop year, according to a report issued by railway officials. It is noted from Vancouver in the same period there have been 20,412,224 bushels, comprising 15,444,244 bushels to the United Kingdom, 4,616,106 to the Orient and 2,351,874 bushels to South America.

The aggregate value of all field crops in Canada in 1922, was \$301,754,266, according to a report of the Bureau of Statistics, a decrease of \$70,528,000 from 1921, caused mainly by the lower prices applicable practically to every crop. This sum was made up of the following items: wheat, \$216,506,709; oats, \$177,704,400; barley, \$22,055,709; rye, \$11,244,900; hay and clover \$12,242,000; mixed grains, \$17,444,000; potatoes, \$27,875,200; turnips, etc., \$22,202,100; corn, buckwheat, \$12,454,000.

A golden wedding celebrated by Mr. and Mrs. E. H. Williams, of Regina, Saskatchewan, was one of the novelties enjoyed by the passengers on board the Canadian Pacific "Empress of Britain" when the ship was at Barbados during the West India cruise. "Here Comes the Bride" was played by the ship's orchestra, and a huge wedding cake was baked, adorned with 50 candles and presented to the happy couple at a surprise party, in which even the crew joined.

Earl Bridson, 17-year-old member, from Le Pas, Manitoba, won the Eastern-International Dog Show Derby at Quebec, receiving the gold cup and \$1000 awarded for the team first past the winning post. The race was run on three consecutive days, February 21, 22 and 23, in daily heats of 40 miles, under extremely trying conditions due to the heavy snowfall on February 22, which was the worst Quebec has known for half a century. Bridson, who won the Le Pas Dog Show Derby, also captured a silver cup awarded for the best-matched team of dogs in the Quebec race. There were 10 starters.

It's So.

There is nothing to be done about the weather. It is cold, windy and autumnal. It requires less care than an all-burning furnace. It has no more use for an argument than a Missouri mule.
